

WARMS BOTTOMS TOO!

Stepping out of a warm bath or hot shower onto a freezing cold floor isn't much fun, especially on a cold winter's morning. Not much fun too if you are a toddler who enjoys playing on the nursery or playroom floor.

With **Cosyfloor™** or Ecofloor™ from R & D Marketing, you can be sure that both toes and bottoms are comfortable and warm.

Cosyfloor™ is supplied in mat form, in a choice of sizes to suit the area to be covered, and is easily installed on any solid based level floor, transforming cold surfaces such as tiles, marble, natural stone and hardwood into inviting warm floors.

Ecofloor™ is supplied in cable kits of different lengths. Like **Cosyfloor™** the cables can be supplied to fit the area as required.

Both underfloor heating systems are covered by 10 years manufacturer's warranty, are completely safe and have low running costs. They are the ideal way to make use of otherwise cold areas throughout the year, such as conservatories, they reduce condensation and are totally maintenance free.

Prices for **Cosyfloor™** mats start at approx £29.00 for a 1 sq metre area.

Ecofloor cable kits start at £ 29.00 for a 1 sq metre area.
